

# Helping Math Not Seem Like a Foreign Language

EQ: How can we teach early number concepts to second grade ELLs in an effective and engaging way?

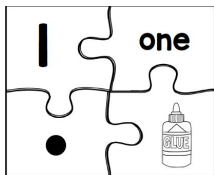

**Goal/Objective:** Help five ELLs develop early number concepts and number sense through the use of various interactive activities.

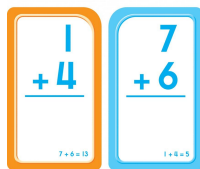

**Rationale:** This project allowed for differentiation for students who are still learning the basics of the English language and are still expected to stay on grade level. Because their bilingual classmates are expected to be fluent in basic mathematics skills, it was apparent that in order to properly support them we find effective activities for the ELL students so that they can develop early number concepts and number sense. These concepts follow Kindergarten Common Core standards.

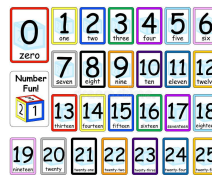

## Number Sense Puzzles 1-20

## Addition Flashcards

## Counting Flashcards

## Pom Pom Quantity Representation
